This house is located east of Maryland Route 66 just north of its junction with Chewsville Road, about 2-1/2 miles south of Cavetown in Washington County, Md. It is situated on level ground a few hundred feet from the road and faces west.

The structure is a two-story, three-bay brick dwelling with white trim. The walls are set on low foundations of coursed local field-stones. The bricks used in the wall construction are set in common bond at all elevations with there being, generally, seven courses of stretchers between header rows. Flat brick arches one brick in height are present over windows of the main stories.

The windows appear to be spaced evenly in the walls, having twoover-two pane Victorian period sashes held within narrow frames.

The main entrance is located in the center bay of the front elevation. The doorway is simple in appearance and is framed similarly to the windows. Above the door is a transom showing arched panes. A modern shed roof entrance porch is present at the front elevation.

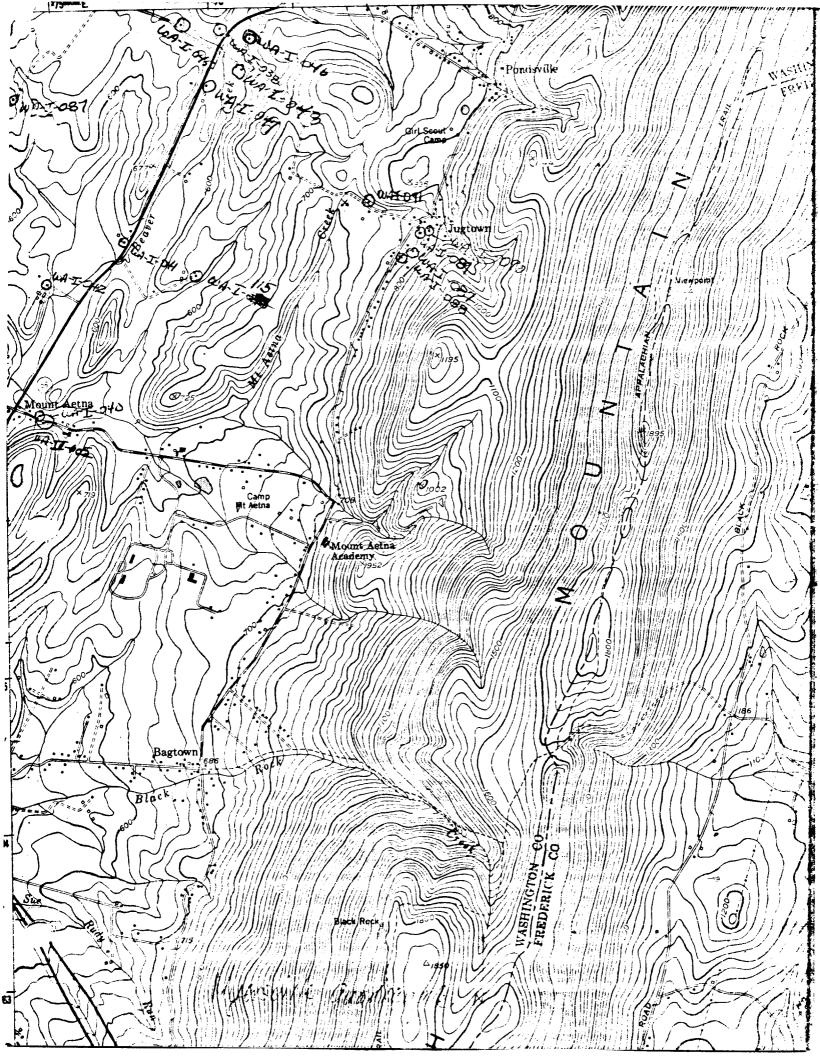

The roof extends for several inches beyond the walls of the house. The cornice and barge are adorned with several courses of simple molding. Brick chimneys are located inside each gable end.

The house is in excellent condition and is located on a tract containing 55.1 acres.
